AJ JANDREI MERCADO

Full-Stack Web & App Developer

ajjandreimercado@gmail.com | Butuan City, Agusan del Norte, Philippines
github.com/ajjandreimercado

PROFESSIONAL SUMMARY

Information Technology student and full-stack developer who builds websites and apps end to end, from planning and design through deployment. Has shipped live web platforms used by real customers, including a vehicle marketplace and a hotel booking website, and has hands-on experience in machine learning and computer vision. Known for strong time management and teamwork.

SKILLS

Languages: TypeScript, JavaScript, Python, Kotlin, Dart, PHP

Mobile: Flutter, Android (Kotlin)

Machine Learning: MediaPipe, GRU, LSTM, YOLO (computer vision)

Web: React, Node.js / Express, Laravel, Tailwind CSS

Databases & Tools: MongoDB, MySQL, Git

Game Development: Phaser.js (turn-based RPG mechanics)

PROJECTS

BroomBroom: Online Vehicle Marketplace

Technologies: TypeScript, React, Node.js / Express, MongoDB, Tailwind CSS

- Online marketplace for buying cars, motorcycles, trucks, e-bikes and more in the Philippines.
- Buyers can browse and compare vehicles, apply to buy with cash or financing, and message sellers in one place.

MadyawPH: Hotel Booking Website & App

Technologies: TypeScript, React, Laravel, Flutter, Tailwind CSS, MySQL

- Booking website for Madyaw partner hotels: guests find a hotel, pick a room and dates, and send a booking request.
- Integrated GCash and Maya payments once the hotel confirms a booking.
- Built the companion mobile app, dashboards, user role permissions and billing components.

EmergenSign: Sign Language Emergency Translator

Technologies: Kotlin (Android), Python, MediaPipe, GRU neural network

- Offline Android app that helps Deaf and Hard-of-Hearing patients communicate with emergency responders.
- Translates 15 Filipino Sign Language emergency signs into English and Filipino text and speech in real time.
- Asks the user to re-sign when confidence is below 90%, tags messages by severity (Critical, Symptom, Request), and keeps a timestamped patient symptom log that can be replayed and exported.

Flutter apps: PickleDesk (pickleball court management with reservations, tournaments and revenue dashboards), Hyperflow (hydration tracker), TipiDex (budget tracker for income, expenses and savings), Limpyo (swipe-to-declutter photos and videos).

LEADERSHIP & ACHIEVEMENTS

Capture The Flag (CTF) Competition Winner — 2026

Caraga State University – DAUG

Technical Officer-in-Charge

Student-Organized Capture The Flag (CTF) Hacking Competition

- Planned the game phase timelines for the competition.
- Facilitated the Programming, Capture The Flag and Web Design competitions.

Startup Pitch Contributor — 2026

Pagsanyog 2026 — Ed-Tech Mentor Platform Concept

- Bridged coding and business strategy: drafted academic objectives, mapped target markets and ran customer validation interviews.
- Structured the project pitch and competition responses for the university-level startup event.

EDUCATION

Bachelor of Science in Information Technology — Expected 2027

Caraga State University – Main Campus, Butuan City, Agusan del Norte
